

Company Profile

Our Practice/

We are an architecture and design practice focused on the application of innovative spatial solutions, with an emphasis on sensitive visual outcomes.

Since our establishment in 2000, we have undertaken many residential and community projects, including medium and large scale housing design. We have demonstrated an ability to achieve design ingenuity within commercial boundaries.

Expertise/

All projects in our office are under the direction of our director Sharif Abraham. Drafting resources are drawn upon depending on the size and nature of the project. We are also supported by a wide network of experienced professionals and technical personnel that are employed on an as needs basis. Each member of the team is dedicated to a project and has a specific role to ensure projects are produced within time frames and budget parameters.

Client philosophy/

We believe that good design is a journey between client and architect, achieved through flexibility. We do not believe in a single solution to a project. We have found that unique outcomes, have developed through strong communication with our clients, and by encouraging them to engage with ideas.

Sustainability/

We believe in a sustainability achieved through buildings that are unique, built of the highest quality and have a longevity outside the fashion cycle. Our emphasis is on a long life span. This discourages waste and achieves flexibility of use over time.

We are also focused on minimizing the impact of the building on the built environment. We work with techniques and systems based on fundamental principles such as passive solar design, natural ventilation and water collection and reuse. We tend to avoid expensive techniques and fancy proprietary systems.

Quality Assurance/

We are a member of the Royal Australian Institute of Architects (RAIA) and a member of the Architects Registration Board. As such we keep informed of courses, publications and issues relating to the implementation and maintenance of best practice procedures applicable to our industry.

Commensurate with the increasing scale and complexity of the projects handled by the practice, we have developed project management skills and monitoring disciplines to ensure that we meet project requirements.

We also have an internal job management system to maintain accurate information relating to the job brief and requirements which highlight all the important actions required to suc-

cessfully complete each project.

We work with the client and the quantity surveyor to assess costs throughout the project and review this against the program budget. We see this as fundamental to successful outcomes.

Major Clients/

- City of Monash (Oakleigh Aquatic Centre)
